

**General Sir John Kotelawala Defence University**  
**Department of Computer Science**  
**CS 1011 –Programming Laboratory**  
**Lab Sheet 02**

1. Write a C++ program to display the following output.

```
USER INFORMATION
```

```
-----  
NAME      : SUNIL SILVA
```

```
ADDRESS: No23, Panadura
```

```
AGE       : 19
```

```
SALARY    : 23500
```

```
GENDER    : M  
-----
```

2. Write a C++ program to print a number entered by the user.
3. Write a C++ program to display the summation of two integers entered by the user.
4. Write a C++ program to swap two numbers entered by the user.
5. Write a C++ program to compute the quotient and remainder when the user gives two numbers. (ie. the first number should divide by the second number).
6. Write a C++ program to print the perimeter of the circle when radius is entered by the user.
